1. List the steps taken to install Java IDE

- a. Download the Installer: i went to the official website of the IDE i wanted to install (e.g., eclipse.org or jetbrains.com) and I installed for windows because my system was windows
- b. I ran the installation file
- c. i followed Installation Wizard from start to finish (accepted all Accept License Agreement)
- d. I specified the directory where I wanted the IDE to be installed and I picked its default.
- e. I then proceeded to start installation.
- d. It installed and i Launched the app

2. Write a Java program to print "Hello World" to the computer screen

```
public class HelloWorld {  
    public static void main(String[] args) {  
        // Print "Hello World" to the console  
        System.out.println("Hello World");  
    }  
}
```
